THE OFFICE OF THE LAND LAW MARSHAL

LAWFUL DEFENCE HANDBOOK

www.landlawmarshal.org

INTRODUCTION

This booklet, or e-book has been created to assist the good people who dwell upon the continent known as Australia, or terra Australis with information to help them make a lawful stand against the Australian Government agencies when confronting corruption, extortion and tyranny.

In this booklet, or e-book, you will find educational material and actionable solutions relative to;

- Historical injustices and the relevance of them in today's world
- Statements of fact without contrary evidence
- The ongoing crimes committed by the Australian government agencies
- Confronting the truth in a world of international criminal enterprise
- Solutions for the future
- Accountability for the past and present
- What to do when being extorted by revenue services (fines)
- What to do when corresponding with the system (fines, contracts, debts)
- What to do if detained by police (defence, behaviour, communication)
- What to do when in a courtroom situation (Jurisdiction challenges, lawful stand)
- How to assert your lawful right to be free
- Pathways to alternative systems
- Creating and securing a united and independent future

Historical injustices and the relevance of them in today's world

The history of mankind is riddled with stories of often saddening and brutal accounts which, throughout the course of time have been the foundations of societies worldwide and have been fundamental in leading us into the technological, geo-political and sparsely connected world in which we live and know today.

We cannot ignore or dismiss the past and hold hope in our future being any less saddening or brutal without severe and everlasting consequences. Honest and informed alternatives are needed.

Precedence comes after the fact, and the precedence for certain international crimes remains an open and unaccounted reality, which is resulting in further criminality internationally.

There has been a long list of peoples historically, who have suffered the results of empires expanding, Nations annexing other lands and the outright declared wars and genocide of people.

We have recorded these events, we have acknowledged them as they came to be, and we have a world of Nations defined by them as a result. We have precedence.

Declarations of war, forced surrender and the cession or cessation of Laws, lands and titles has been the precedence that has governed and made lawful the Nations of this world, and in order for the world to remain with such lawful constructs, this precedence must always be maintained.

This is the fundamental crime happening right now upon the continent known and mapped as terra Australis with the consequences for this injustice capable of affecting worldwide change. Precedence was ignored and replaced with the outright lie 'terra nullius', allowing for atrocities to go unaccounted and for tyranny to continue with impunity.

The existence of hundreds of Sovereign Nations upon this continent cannot be lawfully denied and no evidence exists that declarations of war, surrender of territory or cession or cessation of lawful National Sovereignty through Treaty have ever been recorded. The fact that Australia was unlawfully federated in a foreign Parliament and falsely given status in Nationhood without a single consenting agreement from the hundreds of Sovereign Nations of the continent, is an international crime of genocide.

We, the people who dwell upon the continent terra Australis are unknowingly perpetuating this international crime by upholding what we believe to be a Nation through our tacit consent to its systems of Government and Law, and as a result we have no National Sovereignty rights, no lawful geo-political position, no lawful protections, no human rights and no way possible to prevent or punish corruption and tyranny within what we believe to be our Nation.

For 235 years and up to the date of this publication, The Original Tribal Sovereign Nations of the continent terra Australis have been victim to genocide in all of its lawfully recognisable forms, and continue to suffer the policy driven traumas of this ongoing genocidal occupation.

This is a historical injustice which affects everything we confront today.

The Office of the Land Law Marshal is committed to educating the people of this continent to find lawful ways to assert our defence of the undeniable truth as we find accountability for all of the injustices both past and present in order to clear the path for the establishment of lawful alternatives.

Throughout this handbook/e-book you will confront information that is completely relevant to reasons why we face so much international criminality, as well as its relevance in helping you stand against it.

Relevant Statements of fact

The following statements are factual. These statements exist without any contrary evidence to rebut or have them interpreted incorrectly.

These statements have been asserted on multiple occasions to all levels of assumed Australian Government authority and have never been challenged.

These statements are truth, and can assist in defending any man, woman or child against the crimes perpetrated by Australian government agencies and International corporations.

The more people who can defend their lawful position with these statements, the sooner a lawful alternative direction can become a reality for humanity.

- National Sovereignty is defined as supreme, absolute and uncontrollable and is requisite in a Nations claim to jurisdiction over a population and territory.
- Australia has no National Sovereignty.
- Australian Government and Law systems have no jurisdiction.
- The National Sovereignty of every Original Tribal Sovereign Nation of this continent has never been ceded, surrendered or conquered and still remains the rite and right of these Nations exclusively upon this continent.
- The UK British Crown is not the Sovereign of this continent.
- This continent is not a part of the Commonwealth.
- An Act to Constitute the Commonwealth of Australia 1900, is not a lawful constitution and holds no authority or jurisdiction upon this continent.
- 'Terra Nullius' is a lie, and all contracts since its inception are null and void as a result.
- To enforce Laws and government legislation without jurisdiction upon the Lands of the Original Tribal Sovereign Nations, above these nations Laws, or without consenting agreements prior to a federation, is an act calculated to bring about the destruction of these Nations in whole or in part, and is an act of genocide.
- To force the population to stand under Laws or legislation without jurisdiction is forcing the population to be complicit in genocide, which is an international crime.
- The Australian Government agencies, and judicial systems cannot force any man, woman or child to commit an international crime against their will, without committing multiple international crimes in the process.
- All Australian Law Courts are operating with no lawful jurisdiction and are Kangaroo Courts.
- All Australian Police force representatives are enforcing genocide without lawful jurisdiction, on behalf of a foreign Crown enterprise with no standing at Law whatsoever.
- All Legal representatives are committing genocide, and are complicit in genocide.
- All members of Parliament, past and present are committing genocide and are complicit in genocide.
- All Local Councils are operating with no jurisdiction and are committing genocide and are complicit in genocide.
- Australia is not a Nation.
- Australian citizens are not recognisable in International Human Rights or Law documentation.
- The Original Tribal Sovereign Nations jurisdiction respectively is the only Law on this land.
- All contracts formed with Australia and within Australia are null and void.
- Every Nation in the United Nations consenting to Australia fraudulently claiming Nation Status is responsible for being complicit in the genocide of the Tribal Sovereign Nations of this continent.
- The Holy See is responsible for genocide and Birth Certificate contract is null and void.
- The Holy See Jurisdiction doesn't have a lawful claim upon this continent known as terra Australis.
- Crown Law has no jurisdiction on this continent known as terra Australis
- Common Law has no jurisdiction on this continent known as terra Australis.

The ongoing crimes committed by the Australian government agencies

Due to the fact that genocide is still ongoing without accountability, all crimes being perpetrated are a part of that reality. The Australian government and agencies of the Crown, Commonwealth and other foreign interests have extended their criminality to every Original Tribal Sovereign Nation upon this continent with a consistent and extensive record of these crimes being kept through the attempts to operate Australia as a Nation, as well as the records of settlement prior to the alleged federation.

With use of uninformed consent, the Australian government mandates electoral proceedings and enforces financial penalty (extortions) against people who do not contractually elect (vote) them as representatives of the people's interests, directly and publicly inciting the people to enforce their claims to jurisdiction so as to maintain the façade of legitimacy via tacit consent. This is an abhorrent act of genocide and direct and public incitement to commit genocide which are international crimes.

The destruction of cultural sites and lands under resource contracts created within the constructs of this unlawful claim to jurisdiction are all acts of genocide, destroying these Nations in whole or in part, profiting from the theft of resources from these Nations and extorting the people in the process.

The use of legal (not legitimate) incarceration, penalty or prohibition without lawful jurisdiction is a violation of the rites and rights of mankind, and the assumption that Kangaroo Courts can determine on such matters in an international crime of genocide, being an act calculated to bring about the destruction of these Nations jurisdiction on these lands, in whole or in part.

Regardless of the National heritage of any man, woman or child upon this land, any enforced authority being directed at them as a legal person, is using an unlawful assumption to jurisdiction on real Sovereign Nations lands and is an act of genocide and complicity in genocide which are international crimes.

Use of Native title agreements, "Aboriginal and Torres Straight Island" titles, corporations, organisations and government departments or initiatives contractually attempting to obligate the Original Tribal Sovereign Nations peoples under the false identification as "Aboriginal and Torres Straight Islander" peoples is an act calculate to usurp the real identity of each independently Sovereign Nations peoples and annex their jurisdiction respectively under a singular title, which is designed to bring about these Nations destruction, in whole or in part, and is an act of genocide.

Use of unlawful contracts to form banking institutes, government treasury departments, an Australian dollar, financial trade agreements and debt and using these infrastructures to dictate conditions of life to any man, woman or child without evidence of lawful jurisdiction through a lawful National Sovereignty as Australia, is an ongoing act of genocide and a very serious crime against all those participating unknowingly.

Forcibly removing children from these Nations into other situations is also an act of genocide, and it continues today with forced removal of children though Kangaroo Court orders and Unlawful departments of Child Protection, pleasing a criminal system ahead of the rights and wellbeing of the children and families involved.

However you choose to breakdown the existence of the Australian government and Law constructs upon this continent, you will, undoubtedly come to the conclusion that it is all still an unlawful act of genocide and no obligation exists for accountability within its criminal framework.

Australia, as Law and government bodies, exists only as an international crime of genocide.

Confronting the truth in a world of international criminal enterprise

It is obviously going to be a difficult truth to absorb for many patriotic and Nationalistic Australian people, as well as all of us who have never been introduced to this type of information before, but when confronted by something that states itself as the truth, then it is imperative to have context and information to help you comprehend and engage wholeheartedly so as to avoid misinterpretation.

Not one man, woman or child was alive, or responsible at the time of the alleged federation of Australia, and nor should any man, woman or child carry the shame or guilt of those who were, and those who were engaged in committing these acts and that should never be asked of anybody.

What is our responsibility however is ensuring, without doubt, that the systems that stand above our freedom and liberty, and define how we are internationally recognised, should be solid, and with the integrity to withstand any level of scrutiny. If they stand with any level of lawful opposition, then they simply do not have the requisite integrity to claim any type of authority over anybody and must be held accountable for such deceit.

The fundamental flaw in what we believe is our Nationhood, has allowed for the most absurd levels of impunity for international criminal enterprise resulting in over two centuries of unlawful contracting with hundreds of Nations and thousands of multinational corporations worldwide, expanding their profiteering upon these lands without any lawful consequences for being complicit in the genocide of the Nations here.

Their complicity makes them accountable, and criminally liable for reparations owed to humanity.

235 years of worldwide agendas to make the real Laws of this land disappear through unlawful contract making and the outright theft of these Nations under foreign occupation and an ongoing effort to usurp this continent under false claims and have the people committing these actions on their behalf.

Multinational corporations, acting with unlawful contracts are profiting from the theft and destruction of these Nations with the assistance of the Australian government and Crown Law agents.

In order for the future to be lawful, and to end the agendas threatening humanity upon this planet, we must first cease and desist in allowing precedent where crimes of this nature are allowed to continue.

This means we must find accountability for the ongoing genocide, and make right the lawfulness of all who dwell upon these Nations lands. With worldwide accountable parties, this is an enormous confrontation and undertaking, but never the less, one which must be actioned in defence of all humanity, or we will never find an end to the international criminality happening with arrogant impunity as a direct result.

The whole world is reflective of the crimes of those who came before us, and the systems and organisations who govern these crimes in their continuation are all accountable to this present day.

It is up to the people to hold them to account, and support lawful direction which can make that a reality.

Everything starts with confronting this truth, and denying anything unlawful its claims to authority, and decision making, so the people can put forward the best and most honourable representation as we create lawful alternatives in local National situations as well as new international diplomacy, of the people, for the people, in favour of a healthy and lawful future for humanity.

Solutions for the future

Solutions for we the people to find alternatives for the systems of criminality we have historically confronted are exponential when we take into consideration the depth of what is available.

The 235 years of unlawfully occupying infrastructure currently operating this continent and its 26 million people can easily be considered a gift that we the people can annex and restructure in a multitude of ways that can lawfully acknowledge the real Sovereign Nations of this continent as well as maintain a comfortable and familiar standard of social and environmental lifestyle to avoid anarchy and make transitioning smooth and reassuring for all who dwell upon these lands.

Due to the volume of Nations involved upon this continent, such new inter-national diplomacy would also affect great lawful change worldwide, where peoples from all Nations can stand in their National Sovereignty to restructure their National governments, for their people, and redefine international diplomacy in benefit of all mankind, the planet and the future.

Agreement making between the Original Tribal Sovereign Nations, is fundamental for moving forward lawfully, with the capacity to determine a united future extensively possible through processes of international Treaty making.

Such processes have already begun, with Tribal Nations Treaty between several Nations already moving throughout the continent formatted on Kangaroo skin to protect and eternalise their existence. These Treaties are providing the people in each Nation involved with lawful protection under Tribal Law jurisdiction and can be essential in providing the building blocks for alternative systems of governance that are for all people equitably, with the protection of lawful rights and liberties as their foundation.

Concepts such as the Peoples Treaty have also been created as ways to bring all the peoples upon this continent into a position of lawful standing and as a means to provide equitable engagement and outcome as we progress forward toward a unified future. Peoples Treaty is an agreement that could be made by all people to acknowledge and defend the National Sovereignty of the Original Tribal Sovereign Nations exclusively and to collect the will of the people so as to create new civil Law constructs across the continent, for the benefit of all peoples equitably, but with foundational jurisdiction for such civil laws, coming from the True Original Tribal Sovereign Nations Laws of the Land in such a manner as to protect the sacredness of the Tribal Laws eternally.

Formation of National Governments has also begun, with multiple Original Tribal Sovereign Nations creating foundational documents and constitutions etc to establish their rightful position to self-determine upon this planet as per their independent National Sovereignty rite or right. Such progress is relevant to procedures being worked out and a way to avoid the usurpation happening with similar attempts acknowledging the Crown, and Commonwealth unlawfully.

The possibilities for ways to restructure this continent are endless when we the people confront our responsibility in ending the foreign occupation known as Australia in order to give way to a platform for such change and it is beyond time to make this the most important conversation in this world today.

Everything begins with truth telling. Acknowledging the reality of the foundations of where we have all come from to be at this point in time now, and how we can unify on that common consciousness honestly, with integrity and with lawful direction capable of protecting both the future generations ability to create, dream and expand securely, and the ancient timeless history of life, love, law and humanity.

A united people, asserting and defending the lawful positions available within this handbook, could be organising the restructure of the currently unlawful local governments, into localised National Governments of each Tribal Sovereign Nation respectively and asserting the will of the people in formal agreement making with the Tribal Sovereign Nations.

A lawful annexing of the current infrastructure by a united people, with the acknowledgements of each Tribal Sovereign Nation could easily be structured to operate securely across this continent in union, to maintain a peaceful order as we transition into a lawful construct of the people, by the people, for the people founded by real Tribal Sovereign Nations jurisdictions to eternally honour that ancient Law connection and spiritual history, whilst ending the ongoing occupation of trauma and bringing about the healing of both the people and the land with truth and lawfulness as our responsibility.

All of this is possible if the people acknowledge the real Nations upon this continent exclusively as the only jurisdiction capable of governing lawfully and unify through action to hold the foreign systems of genocide to account while restructuring local Nations ahead of maintaining the claims to Australia as anything more than a name for a continent.

Such processes to restructure civil society from a lawful jurisdiction will equate to massive expansive freedom and liberty being the opportunity of such a step forward, and it stands to reason that we should no longer be in denial of this truth.

The Australian Government still attempts to contractually obligate the Tribal Sovereign Nations peoples into its foreign occupation to finally have its assumption to jurisdiction appear legitimate and we the people are blessed with a truth lawfully capable of stopping their agendas, corruption and criminality.

A truth about hundreds of independent Sovereign Nations, the ongoing crimes against them, and the levels of reparation owed as a result, will bring apart the agendas that control this world's direction and assert a foundation for a future where people can grow, dream and expand without agendas contractually holding us back. We can set the precedence that international criminality will not be tolerated in any of its forms and start the process of ending it.

Accountability for the past and present

The Office of the Land Law Marshal has put forward a direction toward finding accountability for genocide in all of its forms in correlation with International Law.

Notice has been issued to the International Criminal Court of their complicity in genocide and resulting responsibility in understanding and adhering to protocols as we progress.

With the support of you the people, through our online petition form, and with the assertion that the International Law will be upheld to its fullest integrity, the Office of the Land Law Marshal will be charging all complicit parties in the 235 years of ongoing genocide of the Original Tribal Sovereign Nations including, but not limited to, the Australian Government and all attached agents and agencies, The Commonwealth, the Crown, the Holy See, ICC, Worldwide Governments, The United Nations, Multinational corporations, International Banking Institutes, WEF, WHO, Intelligence agencies, foreign militaries and associated accountable parties.

Notice has been issued on multiple occasions to Members of the Australian Government's line of authority including, but not limited to members of Parliament, recorded interview with Australian Federal Police, The Governor General, New South Wales Police, ACT police, QLD Parliament, WA Police, SA Police, Magistrates, Registrars, Tribunals, law offices and other Kangaroo Court officials. No contrary position, nor evidence has been offered in defence of their criminality.

Multiple acquiescence periods have expired, with acquiescence to the truth in the position asserted by the Office of the Land Law Marshal being accepted on numerous occasions as an admission to guilt.

All correspondence between any party and the Office of the Land Law Marshal is recorded and duly noted to be audited and used as evidence in International genocide proceedings with accountability assured in correlation with international Treaty series 1951; Genocide, Article IV for constitutionally responsible rulers, public officials and private individuals alike.

Nobody is above the law and there is 235 years of evidence of crimes ongoing, and nothing at all contrary to that statement as fact, with an enormity of criminal responsibility shared worldwide, of which the repercussions will reset and restructure the ways forward if and when the people put their energy behind genuine lawful directions for solution such as put forward by the Office of the Land Law Marshal.

Whether people are ready to confront the truth or not, is beyond anybody's ability to assume, so this handbook has been created to give concise and direct knowledge and lawful remedy to help the people get a grasp of the crimes happening against them whether they be of Tribal Sovereign Nations heritage or other.

Every criminal act perpetrated against the people by the Australian Government systems and agents, exists without obligation for accountability as a direct result of the ongoing genocide and unlawfulness or lawlessness on this continent and we the people will never see appropriate justice, nor will we end their tyranny by allowing them to get away with genocide in any of its forms.

For those of you who believe in remedy for the crimes perpetrated on you or others worldwide by international criminals such as foreign military occupations, warmongers, the WHO, Vaccine companies, Media outlets, Big pharma, the centralised banks, the Crown etc, you will never see remedy if the precedence is left that genocide and lies such as "terra nullius" remain unaccounted for.

Genocide must not be tolerated and the peoples support is needed so that our Office can apply the requisite energy to action remedy and educate more and more people to do the same. Together we will hold to account all worldwide agendas that threaten the existence of our humanity. Your assistance in sharing our petition and speaking on why others should support it too is necessary as we expand and unite across this world to end the lies and set forth a foundation for a secure and lawful future.

Accountability for this one enormous crime, will ripple through the world and create the pathways forward in its wake.

The people of all the world's Nations can assist in this process by asserting that their Nations obligations in International Law are upheld without negotiation, and International Military bodies can uphold them with direction from an International Court, operating upon this continent, under authority of the Original Tribal Sovereign Nations who are not complicit in genocide.

An International Court of this nature is well within the lawful capacity of the hundreds of sovereign Nations of this continent, who can use International Law without obligation to contract with it, and stand as Nations in the re-creation of international diplomacy.

The ongoing complicity in the genocide of these Nations can cease, and the International Law can be asserted as it was agreed by the Nations who created it.

International Military Law bodies must act within the protocols set in place and the people worldwide are a necessary part in making them stand to their obligations.

The Office of the Land Law Marshal is engaged openly in creating this direction and we require assistance through public exposure of the truth as our future demands our effort to become relevant in it becoming a reality.

The conversation is the peoples and must not be left in Australian Government control.

What to do - What not to do

The following sections of this handbook are designed to assist the people upon the continent terra Australis in defending their lawful positions against the Australian Government and all attached agencies in matters relating to fines, dealing with the Police forces and inside the Kangaroo Courts.

Below you will find relevant information regarding what to do, and what not to do, as well as templates to offer you the best chance of maintaining a lawful position in your defence.

What to do when being extorted by revenue services (fines)

A common situation that majority of people on this continent face throughout our daily lives here is fines of extortionate levels being issued constantly for offences that are beyond our control, unnecessary, and in all actuality and truth, completely unlawful and not applicable to any one of us when we stand in lawful defence of the real Sovereign Nations and Laws of these lands.

It is important that we the people are willing to conduct ourselves in a manner that is not threatening nor dangerous when going about our daily lives, and when we defend ourselves lawfully, and as such we should not be treated as criminals when living out our existence, despite any infringements which are allocated to us when deemed an offence by the criminal Australian government systems of enforcement.

It is a consistent event for people upon this continent to find themselves facing infringements, fines and financial penalty for all manner of offences, misdemeanours and unpaid debts and the unlawful systems designed to enforce these penalties are in fact the ones committing the crime against you.

The Revenue departments and services currently acting as enforcement for financial penalty are completely void of any contractual jurisdiction and as a result cannot maintain any lawful claim that may authorise them to instigate penalty against you financially, without committing the International crime of genocide against the Original Tribal Sovereign Nations. This is a lawful statement of fact and the Office of the Land Law Marshal is willing to assert and defend this in front of any contrary claim.

When engaging with Revenue departments and services, the Office of the Land Law Marshal advises that you act respectfully, yet be assertive with your knowledge of the truth alongside all relevant statements of fact. The people are not criminal, the systems are.

Whenever engaged with the systems which you now know factually to be criminal, it is important not to negotiate within their terms, and to maintain your position with absolute confidence, willing to push beyond their threats so as to achieve a desirable outcome.

It is most important to note that the Revenue and government systems will attempt to assert their assumptions to jurisdiction by issuing further penalty notices, suspending drivers licenses and threatening or engaging in financial garnishing or property theft to collect, so you must be ready and willing to stand in full defence of the truth, and challenge their assumptions to provide evidence contrary to the information you present in your defence. This may mean, driving on a suspended licence, denying and ignoring mail sent in relation to a matter, challenging the jurisdiction of the Kangaroo Courts and small periods of detainment as a result. We do endeavour to avoid these outcomes with the information provided in the template below, but cannot assume to know the reaction and bully tactics in each case.

It is the intention of the Office of the Land Law Marshal to resolve the lawfulness issue upon this continent swiftly once precedence is in place and your willingness to be a part of change is necessary through your actions now when standing for truth against tyranny.

What not to do

As with all correspondence with unlawful Australian Government systems it is of the utmost importance to never allow their assumption to jurisdiction any formal grounding or place in your defence against it.

What this means, is do not cite acts from the Constitution, legislations from the Parliament or State Parliaments, or Common Law claims in your defence, and always defend the rites and rights to National Sovereignty of the Original Tribal Sovereign Nations exclusively.

Due to use of terra Nullius in 1835, it is also unwise to cite Proclamations of the Crown, such as Letters Patent SA, 1836, and Pacific Islander Protections act 1875, because they are acts both written after 1835, and when applied they imply that terra Nullius has lawful consent and they do not apply to the peoples of the real Original Tribal Sovereign Nations as a result.

Basically, allowing the system any assumption to a determination is a course that favours the systems of criminality and imposes unlawful assumptions to jurisdiction over the top of the real laws of the Land and is an act of genocide.

TEMPLATE: REVENUE

Addressing the appropriate Minister or other without honour or title and dating your position respectively, the Office of the Land Law Marshal advises that you use a format similar or the same as the following template when writing to the revenue departments or systems regarding your matter.

In order for the Office of the Land Law Marshal to keep a record of all use of the following lawful defence template, please forward to or cc; office@landlawmarshal.org when sending an exact copy of the below template or alternatively, remove all reference to our office and assert your lawful position independently, using the information provided, and with the appropriate integrity to maintain and defend the statements asserted.

Date ...../...../.....

Attention: ..... ,

RE: ..... (Insert reference number or matter identification).....

It is with dutiful intent to maintain the integrity in Law that I write to you today to assert my lawful position as free from the extortions proposed against me by your revenue department or service.

The matter referenced in this letter cannot and will not be formally acknowledged or accepted without firstly providing evidence of the claim to jurisdiction being made.

I will state with complete certainty that this continent is still the lawful jurisdiction of all of the Original Tribal Sovereign Nations exclusively, and that any attempt to assert your jurisdiction over me, in any matter upon this land is a deliberate act, calculated to bring about the destruction of these Nations, in whole or in part and is an act of genocide.

To make the assertion that I, ... (Insert your name) ....., am to acknowledge or receive instruction or penalty from you, without evidence of a lawful jurisdiction, knowingly committing an international crime, would be an assumption that you have the power to force me into committing the international crime of complicity in genocide.

You cannot force me into committing a crime knowingly and as a result I have withdrawn any and all consent to doing business with you.

I will not be extorted and I will not be complicit in genocide.

For further information regarding genocide and your accountability for it, you can reference; International Treaty series 1951; Genocide.

To reiterate my lawful position, I, …… (Insert your name)….., will not be complicit in genocide and do not consent to your extortions being perpetrated against me.

In order for you to engage with me regarding financial penalty you are required as a matter of lawfulness to present a contrary position to me with evidence of the following;

- Consenting agreements from every last Original Tribal Sovereign Nation of this continent prior to an Act to constitute the Commonwealth of Australia making the claim to federation.
- A recorded declaration of war against every last Original Tribal Sovereign Nation of this continent prior to an Act to constitute the Commonwealth of Australia making the claim to federation.
- Evidence of surrender after declarations of war, from every last Original Tribal Sovereign Nation of this continent prior to an Act to constitute the Commonwealth of Australia making the claim to federation.
- Declarations or proclamations showing lawful cession, or cessation of the rite and right to National Sovereignty from every last Original Tribal Sovereign Nation of this continent prior to an Act to constitute the Commonwealth of Australia making the claim to federation.

Failure to produce the requisite jurisdiction within 48 hours of receipt of this letter and as per the above instructions will be accepted as your acquiescence in this matter and an admission of guilt of your responsibility in correlation with International Law.

A copy of this letter has been forwarded to the Office of the Land Law Marshal to be duly noted and recorded to be later audited and used as evidence in International genocide proceedings

I trust the referenced matter will be dismissed from your records accordingly and thank you for your understanding in this delicate matter.

In defence of the truth and National Sovereignty of each of the Original Tribal Sovereign Nations exclusively, you have now been lawfully served notice of your accountability for the ongoing International crimes of genocide and I assert my position as above.

Signed ……(Insert name or signature)…….

……. (Insert the original Tribal Sovereign Nation of which you dwell upon)……

What to do when corresponding with the system (fines, contracts, debts)

When you come to the undeniable realisation that the systems of Australian Government and Law have been operating since the very first day of their conception without any lawfulness, jurisdiction or right to be upon the land here, you can confront what that means in its entirety when dealing with matters relating to fines issued, contractual obligations with the system or other entities, and debts owed.

The truth is that not one single contract ever written upon this continent has any basis in lawfulness, with the complete void of jurisdiction meaning that, never has a lawful obligation existed for any party to uphold any position assumed in their contracts. No contracts are protected at Law here.

The enforcement of alleged obligations through financial penalty, property seizure and incarceration are all abhorrent acts committed against unknowing peoples and you are in a lawful position to defend yourself against any act which may affect your life, provided you are in defence of the real Original Tribal Sovereign Nations when you do.

As previously learned throughout this handbook, it is an act of genocide for the systems of Australian Government and Law to assume jurisdiction upon this continent without the requisite evidence of National Sovereignty, and as such it is an international crime to participate in maintaining their assumptions in contract or any other manner.

You cannot be forced, coerced or manipulated into committing an international crime and can defend your position lawfully with this truth.

Debts and private contracts are something that can be considered a personal obligation between parties, but in actuality have no lawful protections upon this continent and aside from personal obligation, are completely null and void. It is your choice to uphold any contractual obligations.

No contract has ever lawfully purchased property upon this continent within the systems of Australian Law and no banking institute has ever lawfully traded with a sovereign backed currency here. This is enormously important information and will change the course and direction of the people, the Law and how property is bought and sold upon the land as precedence creates formality for the future.

The Office of the Land Law Marshal advises against attempting to denounce or withdraw from any mortgage agreements at this point in time unless operating under instruction from a Lawful representative of the Original Tribal Sovereign Nation that the mortgaged property is a part of. Lawfully formatted changes of title from the Commonwealth's claims to ownership prior to sale, to titles respective to their lawful Nationhood is a precedent yet to be established for the future, but also a very important precedent to set and will be addressed as this continent ascends into change.

The Australian Dollar is trading unlawfully, as falsified wealth backed through the crimes of stealing this continent from the Original Tribal Sovereign Nations through the 235 of unlawful occupation and genocide. This is a reality which effects everybody and is something that will need to be addressed and restructured to secure and protect the wealth of the people, and operate lawfully as a form of lawful and sovereign backed currency and economy. Right now, multinational corporations are hoarding the wealth of the real Sovereign Nations of this continent, profiting from the theft of all resources both past and present, and the labour of the people through fraudulent sweat equity contracts, birth certificates and bonds inside the realms of foreign criminal enterprise and criminal occupation.

The foreign constructs of International centralised banking have never made a contract which permits them to operate and manage economics upon this continent inside any realms of lawfulness. Every assumption to ownership of property and wealth is an act of genocide against the Original Tribal

Sovereign Nations of this continent with the people being asked to maintain and uphold these actions unknowingly under the false pretence of property ownership and rights.

It is a difficult truth to confront, but nobody owns anything upon this continent lawfully unless expressly permitted by the Tribal jurisdiction of the Nation you reside upon respectively.

Major changes need to come into place throughout all constructs of the systems upon this continent before anybody can lawfully hold the rite and right to possession and if we ignore this truth we will have foreign International agendas assuming contractual control over everything anyway and we will all be in the same position regardless. Our continuing ignorance will allow these agendas to own everything in place of us all, whereas we the people upon the many Original Tribal Sovereign Nations have the perfect opportunity to assert truth and restructure our reality now, one step at a time, to assure the security of all that we possess and hold dear to us here in our lives.

If you wish to stand in absolute conviction and truth to defend your property upon this continent then an alternative must be in place to assert your position as lawful.

One such an idea would be to have titles contracted for your property within the real Sovereign Nation it geographically exists upon, written and given jurisdiction to, from said Nation's Original Tribal Sovereign Nations representatives of National Sovereignty councils or law/lore peoples. Use of this document in place of the claimed deeds and titles of the banks, The Crown, the Commonwealth, as well as Federal, State and local government assumptions to jurisdiction, is a viable course of action.

Actioned alongside Treaty and acknowledgements between the Sovereign Nations of this continent, such titles would lawfully bring about your possession of the property upon the land, and eternally protect the land itself as part of the Sovereign Nation it has always been.

Nobody can own the land, only the property that sits upon it can ever lawfully be the possession of anybody. The land itself will always belong to the Sovereign Nation for every generation to come.

The templates available for fines, contracts and debts in this section of this handbook can be used for a multitude of different circumstances, all with intention to be asserted in defence of the real Sovereign Nations upon this continent.

Note: If you are seeking to remedy debt regarding property mortgage, please be advised that the mortgage template must be officially recorded by the Office of the Land Law Marshal and will require you to send it to our office in order for our office to maintain and marshal the integrity in how alternative contracts are being created and that they have sought the appropriate jurisdiction in their process. The formation of Original Tribal Sovereign Nations representative bodies is a process each Nation independently has rite and right to create and the Office of the Land Law Marshal cannot progress with lawful defence of any property without prior consent and lawful acknowledgement from any such representative body respectively.

If you have fines which have not yet been forwarded onto a revenue department or service, the following template can be used as a lawful defence and to assert your position lawfully. A reminder that use of exact copies of this template need to be forwarded to office@landlawmarshl.org to be recorded and duly noted, otherwise alternatively you can remove any mention of the Office of the Land Law Marshal and defend your position independently with the available information, provided that you act in integrity and in defence of the real Sovereign Nations when you do.

What not to do

As with all correspondence with unlawful Australian Government systems it is of the utmost importance to never allow their assumption to jurisdiction any formal grounding or place in your defence against it.

What this means, is do not cite acts from the Constitution, legislations from the Parliament or State Parliaments, or Common Law claims in your defence, and always defend the rites and rights to National Sovereignty of the Original Tribal Sovereign Nations exclusively.

Due to use of terra Nullius in 1835, it is also unwise to cite Proclamations of the Crown, such as Letters Patent SA, 1836, and Pacific Islander Protections act 1875, because they are acts both written after 1835, and when applied they imply that terra Nullius has lawful consent and they do not apply to the peoples of the real Original Tribal Sovereign Nations as a result.

Basically, allowing the system any assumption to a determination is a course that favours the systems of criminality and imposes unlawful assumptions to jurisdiction over the top of the real laws of the Land and is an act of genocide.

TEMPLATE: FINES

Addressing the appropriate Minister, Council, Department or Toll corporation without formality, the Office of the Land Law Marshal advises that you use a similar format or exact copy of the template below when corresponding in defence of your position against fines.

In order for the Office of the Land Law Marshal to keep a record of all use of the following lawful defence template, please forward to or cc; office@landlawmarshal.org when sending an exact copy of the below template or alternatively, remove all reference to our office and assert your lawful position independently, using the information provided, and with the appropriate integrity to maintain and defend the statements asserted

---

Date ...../...../.....

Attention: ..... ,

RE: ..... (Insert reference number or matter identification).....

It is with dutiful intent to maintain the integrity in Law that I write to you today to assert my lawful position as free from the extortions proposed against me by you.

The matter referenced in this letter cannot and will not be formally acknowledged or accepted without firstly providing evidence of the claim to jurisdiction being made.

I will state with complete certainty that this continent is still the lawful jurisdiction of all of the Original Tribal Sovereign Nations exclusively, and that any attempt to assert your jurisdiction over me, in any matter upon this land is a deliberate act, calculated to bring about the destruction of these Nations, in whole or in part and is an act of genocide.

To make the assertion that I, …… (Insert your name) ……, am to acknowledge or receive instruction or penalty from you, without evidence of a lawful jurisdiction, knowingly committing an international crime, would be an assumption that you have the power to force me into committing the international crime of complicity in genocide.

You cannot force me into committing a crime knowingly and as a result I have withdrawn any and all consent to doing business with you.

I will not be complicit in genocide.

For further information regarding genocide and your accountability for it, you can reference; International Treaty series 1951; Genocide.

To reiterate my lawful position, I, …… (Insert your name)….., will not be complicit in genocide and do not consent to your extortions being perpetrated against me.

In order for you to engage with me regarding financial penalty you are required as a matter of lawfulness to present a contrary position to me with evidence of the following;

- Consenting agreements from every last Original Tribal Sovereign Nation of this continent prior to an Act to constitute the Commonwealth of Australia making the claim to federation.
- A recorded declaration of war against every last Original Tribal Sovereign Nation of this continent prior to an Act to constitute the Commonwealth of Australia making the claim to federation.
- Evidence of surrender after declarations of war, from every last Original Tribal Sovereign Nation of this continent prior to an Act to constitute the Commonwealth of Australia making the claim to federation.
- Declarations or proclamations showing lawful cession, or cessation of the rite and right to National Sovereignty from every last Original Tribal Sovereign Nation of this continent prior to an Act to constitute the Commonwealth of Australia making the claim to federation.

Failure to produce the requisite jurisdiction within 48 hours of receipt of this letter and as per the above instructions will be accepted as your acquiescence in this matter and an admission of guilt of your responsibility in correlation with International Law.

A copy of this letter has been forwarded to the Office of the Land Law Marshal to be duly noted and recorded to be later audited and used as evidence in International genocide proceedings

I trust the referenced matter will be dismissed from your records accordingly and thank you for your understanding in this delicate matter.

In defence of the truth and National Sovereignty of each of the Original Tribal Sovereign Nations exclusively, you have now been lawfully served notice of your accountability for the ongoing International crimes of genocide and I assert my position as above.

Signed ……(Insert name or signature)…….

……. (Insert the original Tribal Sovereign Nation of which you dwell upon)……

What to do if detained by police (defence, behaviour, communication)

It is an all too common occurrence for a member of the public to have dealings with the Police forces currently assuming their jurisdiction to enforce foreign Crown Laws upon this continent. As a matter of safety and well-being, the people should take every precaution when attempting to assert their lawful position to avoid engaging in argumentative or threatening behaviour.

The vast majority of Crown Law enforcement are completely unaware that they are acting criminally on behalf of a foreign entity and they do not often consider statements and truth before assuming their authority and power over you in many cases.

When corresponding with the Police, the Office of the Land Law Marshal advises a level of cooperation and respect, along with a willingness to be processed within their assumptions so as to avoid confrontation with armed forces, as well as to allow for opportunity to have your lawful position confronted where it matters in their Kangaroo Courts.

This means, accept being detained as mere inconvenience, whilst asserting your position lawfully as a defence. Unless you are being detained for an incident of a serious nature, you will likely be released within a very short period of time in almost all cases.

Whilst in the custody of an unlawful occupation, you will experience no lawful protections or rights and as such the Police can use excessive force with impunity if you give them reason, so the Office of the Land Law Marshal advises against argumentative or aggravating behaviour and language at all times so as to protect you throughout any experience you may be forced to engage in.

The Office of the Land Law Marshal advises that you take advantage of any opportunity offered to be recorded in statements of your defence whilst in their custody. Record of your lawful position is your best defence and simply stating that you have acknowledged the real jurisdiction of the Original Tribal Sovereign Nations exclusively ahead of their assumptions to jurisdiction will put the onus on their system to provide evidence to the contrary in order for your statement to remain on the record.

During any questioning, it is advised that you be completely honest, and hold yourself accountable for any actions that may be outside of peaceful order so as to maintain integrity in your lawful position defending the National Sovereignty of the Original Tribal Sovereign Nations exclusively.

Throughout your time in the presence of Police, respectfully discussing your knowledge about the international crimes of genocide and their role and responsibility in continuing it will give them all that is needed to be informed of their willingness to knowingly commit such crimes.

Assert clearly that you will not be complicit in genocide, which is an International crime, and you cannot be forced to commit a crime knowingly.

If you are aware of the name of the Original Tribal Sovereign Nation you are on when detained, you can assert that Nation as the only lawful jurisdiction to replace their assumption to authority over you.

Assert a willingness to have their Kangaroo Courts attempt to determine on your matter and inform them that such a court will need to provide evidence of National Sovereignty for Australia before any assumption to jurisdiction made by them can be recognised as anything other than an international crime of genocide.

When engaging with the Police;

- Remain calm and concise in sharing the knowledge you have regarding jurisdiction
- Be respectful with your language and attitude
- Acknowledge the Original Tribal Sovereign Nations as the only lawfully recognisable jurisdiction respectively upon this continent
- Offer contrary positions to their assumptions with undeniable facts
- Be willing to go through the process
- Tell the truth about any accountability for your own actions that may need to be acknowledged
- Assert that you require their Kangaroo Courts to determine further and only with evidence of lawful jurisdiction
- Respectfully inform Police of their complicity in genocide and continuing genocide by assuming jurisdiction without lawfulness.

What not to do

When engaging with the Police it is important to be cautious and mindful of your actions and language so as to avoid a traumatic situation at the hands of their assumed power and authority.

In all cases where engaging with the Police, the Office of the Land Law Marshal advises that you;

- Do not become verbally or physically aggressive, even if provoked
- Do not engage in violence
- Do not insult or belittle them
- Do not attempt to bribe or extort them
- Do not threaten them or anybody else
- Do not claim sovereignty
- Do not claim rights
- Do not assert or cite any Common Law, the Magna Carta or Constitutional act in your defence

What to do when in a courtroom situation (Jurisdiction challenges, lawful stand)

Due to the assumptions made by the systems of Law and Government, the people on this continent find themselves before Australian Courts repeatedly and the Office of the Land Law Marshal intends to bring forward the truth and put an end to Courts masquerading as representatives of Law, and expose them for the Kangaroo Courts they are.

The term Kangaroo court is an internationally recognised terminology which defines any court or tribunal operating without jurisdiction.

It is of absolutely no coincidence that the word Kangaroo is applied to define a court of no jurisdiction, and despite the attempted diversionary definition that “Court hopping”, a term symbolising a Judge who is jumping jurisdictions and operating a court, is the basis for use of the word Kangaroo in a court with no jurisdiction, it applies more accurately that Kangaroos are only found upon this continent, and all courts

are unlawful and operating without jurisdiction upon this continent. Kangaroo is simply an identifying term for the courts on this continent and as a result, it applies to any other international court or tribunal that operates in the same unlawful capacity.

Without evidence of sovereignty coming from the Crown Sovereign, or from a lawful and internationally recognisable National Sovereignty as Australia, all courts assuming the jurisdiction of Crown Law upon this continent are Kangaroo courts and no contrary evidence exists to that undeniable fact.

Evidence of jurisdiction is essential before Law can be given any determining rite or right over any man, woman or child and that statement should be maintained as non-negotiable.

When confronting a Kangaroo Court proceeding upon this continent, where the Australian Government and Law systems have assumed authority and jurisdiction over you in any matter that has not caused harm, there are statements relevant to your defence that can be held against them so you can remain free from persecution at the hands of the criminal system.

It is important to comprehend, that all you may have learned before this, in regards to how language can be used against you is of no consequence when you assert the truth appropriately. This means you do not have to be cautious of using their legalese language under an alleged threat of entrapment. The English language is almost completely irrelevant when it comes to matters of Law, with only words such as Sovereignty, lawful, jurisdiction and international, having any lawful consequence in any matter at Law. These words only have any relevance because they apply in the international world in every Sovereign Nation on Earth.

This means that you can still use and answer to your full name in any format, as capital letters or as lower case, you can use the word ‘understand’ without giving them any authority in the process, you can be the ‘person’, ‘human’, man or woman, or any other English word, apart from the aforementioned, that may be written into and “legally defined” by the foreign Common Law, and it can never be of lawful consequence.

The misconception that legalese is capable of entrapping you, when it is a part of the fictional assumptions to jurisdiction upon this continent, is common among people and the Office of the Land Law Marshal encourages you to fully comprehend what that means so you can speak openly and honestly in your defence without fear of entrapment.

If you do not ever wish to go into a Kangaroo Court, you are under absolutely no obligation at Law to appear before them at their behest, nor are you required to even acknowledge their attempts to apply their assumptions to jurisdiction over you when you are in defence of the real Original Tribal Sovereign Nations of this continent.

A template is available to assist in you asserting to the Kangaroo Courts your lawful position not to appear as per their demands.

If you do choose to enter their Kangaroo Courts and wish to hold a defensive position against their assumptions to jurisdiction, the Office of the Land Law Marshal advises that you;

- Present yourself in an identifiable manner with your name
- Address the administrator, (judge, magistrate) respectfully but without formality
- Assert that you are aware the proceeding is operating without a lawful consenting agreement to practice Law upon this continent from the Original Tribal Sovereign Nations
- Assert that Law can only exist with evidence of jurisdiction and that the only jurisdiction upon this continent to produce evidence of lawfulness is that of the Original Tribal Sovereign Nations respectively and exclusively.

- Assert that the court must provide evidence of Australia's National Sovereignty through treaty, declarations of war and surrender prior to the alleged federation 1901 or it is a Kangaroo Court.
- Assert that to allow a Kangaroo Court to continue to assume jurisdiction without evidence of any National Sovereignty in their claim would make you complicit in their Kangaroo court applying the rules of their assumed jurisdiction falsely as Law over the top of the Original Tribal Sovereign Nations lawful jurisdiction, which is an act deliberately calculated to bring about the destruction of the Law constructs of the Original Tribal Sovereign Nations in whole or in part, which is an act of genocide in correlation with International Law, Treaty series 1951; genocide.
- Assert that you are aware that complicity in genocide is an International crime and with unwavering conviction assert that you will not be complicit in genocide, and they cannot force, manipulate or coerce you into committing an International crime knowingly.
- Assert your position without negotiation that the onus is on their proceeding to bring forth evidence of its claims to jurisdiction and until they can and do, any matters they seek remedy from you in relation to, are null and void and dismissed.
- Speak clearly, and repeat your lawful position for the record until the abandonment of their claim.

What not to do

When asserting anything at this criminal system and within their Kangaroo Courts, it is advised that you do not engage in any of the following;

- Do not represent yourself, present yourself always
- Do not claim rights as an Australian citizen, or human rights under Australian Nationhood. It does not exist, and offers absolutely no lawful protections to you to claim it
- Do not use any form of Law in your defence that is not exclusively in defence of the Original Tribal Sovereign Nations of this continent and their jurisdiction
- Do not cite precedence from past determinations made by any prior Kangaroo Court proceeding
- Do not file into their systems expecting their protocols to be upheld
- Do not address the administrator as Judge, Your Honour, Your worship or any other. Use their name only, if available
- Do not refer to their assumptions to jurisdiction as "their, your, or the court's jurisdiction"
- Do not assert anything on behalf of a Commonwealth or Crown claim
- Do not file paperwork signed by Commonwealth or legal representatives such as JP's or lawyers.
- Do not employ legal representation to act on your behalf
- Do not allow them any assumption to jurisdiction at any point throughout your proceeding
- Do not become aggressive or violent
- Do not claim personal rights, rites or sovereignty. You are not sovereign
- Do not let them proceed with any consent whilst you maintain your lawful position with the information provided in this document
- Do not use any foreign law, Common Law or constitutional act or precedence as your defence
- Do not be complicit in genocide

There is every chance that throughout the processes of creating awareness surrounding this truth and its use in these Kangaroo Courts, that their system will continue to assume jurisdiction, and consider further escalating their assumptions via contempt charges, remanding without formal prosecution and violence to enforce their crimes upon you.

The Office of the Land Law Marshal seeks to put you, the people at ease about any such situation by asserting that our office will take full accountability and responsibility for the use of this information in any procedure where this information has been put forward accurately, and with the proper integrity.

It is the intention of the Office of the Land Law Marshal to be officially and formally challenged by any level, or even all levels of their assumed jurisdiction to prove contrary to every statement of fact put forward from our office, as our office prepares to charge the Australian Government, UK Crown, Holy See, the United Nations and many other international criminal entities with the 235 years of ongoing genocide and complicity in the genocide happening against the hundreds of Original Tribal Sovereign Nations of this continent.

The Office of the Land Law Marshal asks that anybody who uses the information found in this handbook to make a note, inside their Kangaroo Court on the record, or in any correspondence between you and the Kangaroo courts, that the Office of the Land Law Marshal has engaged in challenging their systems and you will not negotiate from your position unless their assumptions to jurisdiction can prove contrary to our office. Our office is asking you to throw us in the deep end in your defence, by making that statement clear and concise and on their records, so we can confront their assumptions in such a way they cannot ignore or dismiss.

The more people who assert this lawful position into their Kangaroo Courts, the quicker and more effective the Office of the Land Law Marshal will be at confronting their assumptions to jurisdiction to find lawful remedy through precedent and the accountability process.

How to assert your lawful right to be free

Freedom is a concept often felt to be a reality by the people who dwell upon this continent, but in all truth is not at all. A consistent increase in the cost of living, exponential increases in housing, rising fuel costs, higher bills, more legislation designed to penalise you, more taxes, more control, digital data collection, digital identifications, digital currencies, restrictive health policy, mandating and unstoppable environmental damage. Which bit of that equates to freedom? Is it the idea that after slaving for 60+ hours in every household, paying the interest on all your debts, extortionate rent or mortgages repayments, several hundred dollar grocery bills, updates to your phone tech superiority and hundred dollar refuel, you get to spend approximately 20 hours of the available 168 hours each week, spending the remaining balance of your slave earnings on an extravagant lifestyle of so called freedoms?

Without even mentioning the incarceration available for not paying into your slave masters controlling mechanisms, which comes after repeated penalty, extortions and threats from the masters, the idea that we experience freedom is a far stretched reach of our imagination to say the very least.

Freedom is real however. Free men and women exist right now despite all the control applied upon us, and it all relates back to the well known statement, “The truth, will set you free”.

The truth about who you are, where your feet are touching the ground and why the masters systems have absolutely no control of you when you confront it.

The intention of the Office of the Land Law Marshal is to educate and empower you, the people, as the truth becomes far too apparent to ignore and also the genuine pathway to change, accountability and a prosperous future. Your freedom is now.

You are a free man or woman right now, regardless of where your heritage exists within the blood that runs through your veins. You are free to defend the lands upon which you reside and be a part of the changes that will restructure this planet into a world of lawfulness, peace and genuine unification.

Asserting your freedom is not a difficult thing to comprehend either. It can be difficult to stand with conviction, granted, however as more and more people confront the truth which is undeniable, the sooner any fear of making a stand will become a foreign feeling from a broken past.

Regardless of the matter before you and the level of applied control being forced or threatened upon you, a free man or woman has an undeniable defence in the following simple statements;

- We (you and all present around you) are standing on (the Sovereign Nation where you are) Sovereign Nations lands
- The (the Sovereign Nation where you are) has never ceded the right to National Sovereignty and as such is the only Law of this Land
- I am bound by the integrity of Law to recognise (the Sovereign Nation where you are) Laws as the only lawful jurisdiction available to determine upon this land
- I am aware that The Australian Government and Law systems are illegitimate and cannot provide evidence to the contrary
- I recognise the original Tribal Sovereign Nations right to National Sovereignty exclusively
- I am a free man or woman, dwelling upon the (the Sovereign Nation where you stand)
- I am not a subject to the foreign Crown

The above statements are factual, and can be held in any matter to maintain your freedom, even if you are contracted into the unlawful fictional constructs provided by the foreign occupation.

Once you have acknowledged, and defend the truth upon this continent, there is no lawful consequence for you to engage with the system and you do not have to step away from it in order to be free.

The Office of the Land Law Marshal intends to assist in the usurpation of all systems to make the transition into a lawful future smooth and in the best interests of the people so we advise against removing yourself and struggling to survive, when once you've acknowledged what is real, and what is fiction, you can navigate their claims with ease, freedom and stability.

Yes, this means, you can have rego, or a licence, be taxed through your income, hold an ABN, use medical services, collect a pension etc and you are not consenting to any of their authority over you, even when contractually written as such.

Remember, no contract holds any legitimacy upon this continent. A free man or woman simply cannot be contractually obligated to a fiction unless by choice.

Ultimately, defending the rite or right to National Sovereignty of each Original Tribal Sovereign Nation is the difference between being a part of the occupation or not.

The Office of the Land Law Marshal advise that nobody raises any flags in defence of themselves, or to make any claims to Nationhood, unless you fully comprehend the rules of flag laws and are choosing to make your lawful position known, which could very well result in you being accountable for international crimes upon this land. The seriousness of Law upon this planet is not being appropriately respected here and it needs to stop. Ignorance is no excuse at Law, and arrogance can become criminal.

Please respect the Original Tribal Sovereign Nations and fly no flags unless permitted by, or be it representative of, the Sovereign Nation you dwell upon.

Freedom is a responsibility to the truth.

Pathways to alternative systems

Alternatives to what we have in place governing this continent are of the utmost importance moving forward, as the results of accountability for the ongoing genocide here will completely dismantle what we now know to be the Australian Government.

What we have in place today, operating as a three tier system, from Federal to State to Local governments has proven a successful way to maintain governance across the continent but has suffered corruptions as a result of its unlawful foundations and federating claims. With an infrastructure already in place to communicate and administer governance across the continent, a solution to creating an alternative exists within what is in place already, but completely removed from the unlawful claims and occupation of Sovereign Nations currently attached to it.

If each Original Tribal Sovereign Nation is recognised appropriately, through some form of agreement making at each local National level, (such as the Peoples Treaty concept) then a reverse in the current three tier system could easily restructure into a smooth transition forward.

By annexing all current Local governments as the people, appropriating their geographical position to each of their respective Sovereign Nations, we could restructure the local government systems and make them Local National Governments.

Once each Local national government is asserted lawfully as the governing body, the process of inter-national relations between Nations could form regional International governing alliances which can annex the State governments as they are, and then again into what is now Federal, which would be a continent wide Union of Nations, a lawful international body larger than the whole wold combined and a body that can create through agreement making, laws of the land that have real jurisdiction, serve all the people equally, are in the peoples best interests and protect each Nation independently, as well as the continent for the thousands of generations yet to come.

We can annex what is so chaos can be averted. We can take the time necessary as the people, to be engaged in Law making, upholding the Laws of the Land and acting in defence of the truth exclusively, as we progress forward to be genuinely united, regardless of our heritage, skin appearance or locality.

The ancient Tribal Law that each independent Nation here has held through generation after generation for the longest period of any civilization on Earth, must always sit rightfully as the jurisdiction that permits any such civil order and must be respected as such.

The tribal Law has the rite and right to determine the future here, and we the people have this opportunity to work with it, respecting it properly so we can form a civil order and laws of this land, if we, the majority, can honourably act in the proper respect of the Tribal Laws.

Tribal Law cannot successfully govern the people from a minority, but it can be honoured as the jurisdiction for any civil Land laws that we the people can create together and successfully give the appropriate jurisdiction to that civil law whilst maintaining integrity over it.

The above concepts are a real possibility, but cannot be forced into existence and rely completely on us, the people to humbly acknowledge that we, even as a majority should never impose our will above that which is the real Laws, so we can find that honourable balance and integrity that the future generations deserve.

Creating and securing a united and independent future

Unity and independence may be contrary terms, but for the sake of humanity maintaining peaceful relations historical connection and being genuinely unified, independent Sovereign Nations are the only real pathway to such a future.

The significant differences in cultures worldwide has always been a benchmark for what humanity is, and there’s no denying that all cultures have played their part in being a foundation for the world we

experience today. Even though we are all mankind, of one species, we are so remarkably different across the world, evolving with our environments in all corners of the planet to showcase bold, unique and beautiful cultures that define people as who they are.

In a world of Nations with military powers, order must exist to prevent all out chaos and trauma and although some might say that one order is the answer, the evidence suggests that any such concept would be to the detriment of mankind.

It is a one world order sought by the centralised banking systems and governing bodies currently annexing the word's Nations into an agenda designed to enslave us all, and our most saving grace is that we are all still a part of independent sovereign Nations.

Despite the power hold of the agendas at play, the criminal reparations of 235 ongoing genocide here against hundreds of Sovereign Nations will equate to financial losses so significant to them, that any agenda that once held power and authority, will no longer be capable and the governments worldwide will be facing restructure under the direction of the people.

With the lawful introduction of the hundreds of Sovereign Nations of his continent, into international geo politics, and with the wealth of 235 years in reparations to distribute, the doors are wide open for new international diplomacy between Nations worldwide to reset and restructure everything on this planet in favour of humanity.

With all the world's current governments controlled through contracts to the Holy See, in debt to the centralised banks, and operating under maritime laws of the sea upon the land, the Original Tribal Sovereign Nations, with a majority Land Law jurisdiction, and with absolutely no debts or contractual obligation to anybody, can even restructure worldwide military protocols that govern today, so military personnel can swear new oaths to protect humanity and the environment in defence of life and Nation, rather than their nations debt.

So much is available to the world once accountability sets precedence and new international diplomacy become the direction of all the world's Nations peoples.

It all starts by holding them all accountable for the ongoing genocide here and going from there.

"Where there's truth, there's justice"

My sincerest thanks for reading The Office of the Land Law Marshal Lawful Defence Handbook. It is my intention to educate and facilitate actionable concepts for the people and hope you have learned and benefited from your time spent reading and comprehending the above.

The Office of the Land Law Marshal is dedicated to finding accountability for the crimes that divert from our ability to live out a lawful and secure future and relies on your support in order to assert pressure on International players with numbers backing our offices direction.

Please sign and share the Petition on the Office of the Land Law Marshal website by visiting and sharing the link www.landlawmarshal.org

Land Law Marshal
Dylan Wilson

IMPORTANT: Please read Official Statement below.

15th November, 2023

Official Statement

Attention: This statement is to be used in defence of information written in The Office of the Land Law Marshal Lawful Defence handbook

The following Official Statement is from the Office of the Land Law Marshal, written and authorised by Land Law Marshal Dylan Wilson on the date of completion of The Office of the Land Law Marshal lawful Defence Handbook, on 15th November, 2023.

The Office of the Land Law Marshal has repeatedly denounced and challenged the jurisdiction of the Australian Government and Judicial Systems, and acquiescence has been accepted as an admission of guilt to the ongoing genocide of the Original Tribal Sovereign Nations of this continent, through multiple correspondence with all levels of the assumed line of authority making their contrary claim, with all correspondence recorded and duly noted as evidence to be used in International genocide proceedings.

I, Land Law Marshal Dylan Wilson, take full responsibility for the use of any information used in the defence of any man or woman against any Australian Government and Judicial systems as well as Financial Institutes and agencies and all other assumptions to jurisdiction being claimed.

No penalty, extortion or other attempted interference in the freedom or financial position of any man or woman who uses the information provided in The Office of the Land Law Marshal Handbook can proceed without offering a contrary lawful position to the position asserted by the Office of the Land Law Marshal.

Every occasion where this statement is overlooked, denied, or a contrary unsubstantiated claim is made, will be duly noted and recorded and used as evidence against the individual or agent in International genocide proceedings.

If you are a member of the public, and you wish to stand against fine extortions and unlawful contracts, as well as prosecution and incarceration, and you are asserting the truth as learned in The Office of the Land Law Marshal Lawful Defence Handbook, please download and use the above templates, log them officially with our office, and attach this Statement to your position before sending hardcopies, or emails as your defence, so our Office can keep a record as evidence and I, Land Law Marshal Dylan Wilson can accept responsibility for its use.

Always was, always will be, the lands and Laws of the Original tribal Sovereign Nations of this continent.

With trust in your understanding,

Land Law Marshal
Dylan Wilson

“Where there’s truth, there’s justice”
